Educational Background

Formal Education

- **Rekayasa Perangkat Lunak**
  SMK Telkom Sandhy Putra Purwokerto

- **Teknik Informatika**
  Universitas Pamulang (2022 - Present)
  Bachelor of Science, Computer Science, Current GPA 3,44

Qualification

ASP.Net Core C#	: Familiar with developing web applications using the MVC architecture and building RESTful APIs with .NET Core, including authentication, middleware, and Entity Framework Core.
Laravel	: Experienced in developing enterprise web applications using Laravel 12, implementing MVC architecture, authentication, middleware, Eloquent ORM, queues, validation, and modular application structure.
React.js	: Skilled in developing user interfaces using React.js, with experience in JSX/TSX, component-based architecture, state management (Context API), API integration and build tooling via Node.js/npm.
Tailwind CSS	: Developed responsive and maintainable user interfaces using Tailwind CSS, Blade Templates, Alpine.js, and Vite.
MSSQL Server	: Familiar in managing databases using SQL Server Management Studio (SSMS), including query optimization, backup and restore, and data migration.
MySQL	: Experienced in designing relational database schemas, writing optimized SQL queries, database normalization, indexing, migrations, and Eloquent relationships using MySQL
Docker	: Experienced in containerizing applications using Docker, including writing Dockerfiles and using docker-compose to manage development environments efficiently.

API Integration	: Capable of building and consuming REST APIs to enable seamless communication between front-end and back-end systems. Proficient in using Postman for testing and debugging.
Git & Github	: Skilled in Git, GitHub, and GitHub Actions, including branching strategies, pull requests, automated CI/CD workflows, and deployment pipelines.
WordPress	: Experienced in creating, customizing, and managing websites, including plugin integration and theme customization.
Server & Hosting	: Experienced in deploying and maintaining applications on Linux (Ubuntu) VPS environments, cPanel hosting, Plesk, configuring Nginx reverse proxy, SSL certificates, domain management.
Cloud Computing	: Hands-on experience deploying containerized applications using Microsoft Azure, including Azure Container Apps, Azure Container Registry (ACR), Azure Storage, and cloud-native deployment workflows.
Microsoft Office	: Experienced in Microsoft Word, Excel, and PowerPoint for document preparation, data analysis, and presentations.
Language Skill	: Indonesia (active) and English (passive).
Interpersonal Skill	: Ability to relate to others, teamwork, leadership, problem solvers, respectful, committed and passionate.

Experience

PT. Braincode Solution
Intern – Junior Frontend Web Developer
December 2020 - March 2021

- Supported the development of dynamic web applications using AngularJS.
- Collaborated with the development team using GitLab for version control and project management.
- Contributed to fixing UI bugs and improving user interface responsiveness.

Lembaga Sertifikat Profesi (LSP P1)
Freelance – .Net Developer (Support & Maintenance)
January 2023 – July 2023

- Assisted in the development and maintenance of a web-based certification platform using ASP.NET MVC and Razor Pages.
- Worked with Microsoft SQL Server to manage and query relational data, including stored procedures and database design.
- Contributed to UI enhancements using Razor view engine for better user experience and maintainability.
- Performed regular server maintenance, including deployment, troubleshooting, and monitoring of hosted web applications.
- Collaborated with the IT team to ensure system reliability and resolve bugs or user-reported issues in a timely manner.

Wordpress Developer & Designer
Freelance – Wordpress
January 2024

- Developed the corporate profile website for a national energy company with responsive design, optimised functionality, and WordPress-based CMS implementation, jawasatupower.com

PT. Info Solusindo Data Utama
Intern – Department IT Support
March 2025 – June 2025

- Engineered an enterprise-grade document approval and HRIS platform using Laravel 12, MySQL, and Tailwind CSS.
- Built secure Role-Based Access Control (RBAC) supporting 14 user roles using Spatie Laravel Permission.

• Developed configurable multi-level approval workflows with approval chains, approval thresholds, audit logging, and document lifecycle management.
• Implemented Finance modules including Budget Management, Purchase Orders, Invoice Management, and Employee Loan tracking.
• Developed HR Core modules including Attendance, Leave Management, Employee Profile, and Company Announcements.
• Implemented QR Code document verification, PDF generation, and Excel import/export functionality.
• Developed executive dashboards with business analytics, financial summaries, and operational reporting.
• Performed End-to-End Testing using Playwright and static analysis using PHPStan/Larastan.
• Integrated Laravel Pulse for application monitoring and configured SMTP email notifications.
• Deployed and maintained the application on cPanel hosting, including production environment configuration, database migration, and application optimization.
